

## Gemeinsam gestalten. Individuell entfalten.

With more than 3,700 students in six departments, the St. Pölten University of Applied Sciences is a key player of the Austrian higher education landscape and one of the most important employers of the region. The St. Pölten UAS stands for unique creative possibilities as well as team-oriented and interdisciplinary collaboration and leaves room for individual growth and personal development. The University of Applied Sciences is constantly growing. In the Department of Health Sciences, we are looking for a

# Senior Researcher Dietetics f/m/d (30 h)

## What you will be working on

- You initiate and head exemplary research projects with a focus on dietetics research and are involved in ongoing research projects as well.
- You work on the further development of the dietetics research area in close collaboration with the research areas of physiotherapy and nursing.
- You provide impulses for the sustainable development of interdisciplinary research at the Institute of Health Sciences and in cooperation with other research institutes of the St. Pölten UAS.
- You are dedicated to knowledge transfer and innovation in close exchange with the industry and society and you teach courses that are relevant to your field.

## What we expect from you

- A PhD with clear reference to the research area
- Several years of research experience in dietetics research and nutrition science or related fields of research, internationally recognised research and publication activity, successful acquisition and management of research projects
- Basic German language skills or alternatively the willingness to learn German (with support from university)
- Very good networks in the international scientific community and with partners from the industry and society in regional, national, and international contexts
- Your personal qualities include team spirit, commitment, and visionary thinking as well as a willingness to engage in networks across disciplinary borders. You are flexible, resilient, and enthusiastic.

## What we offer

- A familiar atmosphere and flexible working conditions at the Campus St. Pölten with various modes of working (e.g., remote work, creative space, library, or directly in your department)
- Fixed-term employment for 2 years with an option for extension and a gross annual salary that takes your qualifications into account: at least € 60,200 (basis: 40h/week; all-in); flexitime option without core working time and comp time
- For more information, please refer to our [career site](#).

Your application is this way.
