

We are hiring!

Innovation Associate (m/f/x) for our Product Team

About Us

HarvestAi is a startup founded in 2020 with ~3mEUR in pre-seed risk capital and R&D funding. We are a SaaS provider of machine learning and computer vision-enabled growth and yield prediction for indoor farms. Our system is designed to dramatically increase the efficiency of indoor farms worldwide, producing more and better food with fewer resources.

To strengthen our **Product Team** at our headquarters in **Potsdam**, we are looking for an **Innovation Associate (m/f/x) full-time** as soon as possible.

Your Tasks

Supporting project management and product development across the organization by:

- Being the link between our AI development team, our external partners, and clients.
- Expanding potential client database and engaging with potential clients.
- Establishing frameworks for engaging with potential and existing customers to conduct user research.
- Conducting user research in said framework and systematically distilling information gathered into valuable user insights.
- Translating user insights into product requirements and technical specifications.
- Supporting the implementation of your user research results into the product portfolio.
- Ensuring the smooth running of the product development process.

Your Profile

- Bachelor's or Master's degree in:
 - Horticultural science, horticultural engineering, pythotechnology in horticulture, or similar; or
 - product development and design, or similar.
- Strong experience in user research and user experience.
- Affinity to software engineering and data science.
- Previous exposure to greenhouse operations.
- Previous exposure to Jira is desirable.
