Research Associate (m/f/d) - Massspectrometry

To join our interdisciplinary team, we are looking for a technical assistant to support the laboratory work of challenging and exciting customer and development projects. You will become an important part of the Mass Spectrometry group and also work cross-functionally with other groups in the company. We’re located at the IZB in Weihenstephan.

Your responsibilities with us:

• Work independently on both client and research proteomics projects
• Assume responsibility for general procedures and maintenance of first-in-class Thermo mass spectrometry instruments
• Establish new proteomics sample preparation and LC-MS based methods
• Jointly develop the automatization of our proteomics sample preparation pipeline
• Process and assess the quality of MS data

You’re a good fit for us because:

• You have an M Sc. Degree in Life Sciences, Biochemistry, Biotechnology, Pharmacy or BTA, CTA education with at least three years of experience or an equivalent education
• You have at least one years of hands-on experience with LC-MS systems and technologies
• You have solid laboratory experience in proteomics sample preparation methods and automation, ideally in an industrial environment
• You are proficiency in state-of-the-art proteomics data processing software and MS Office applications
• You are able to plan and structure experiments independantly and possess analytical thinking to develop problem solutions and to proactively contribute to the advancement of projects
• You have strong communication skills in English and German, team spirit, and a can-do attitude
• You are enthusiastic to expand your technical and scientific knowledge as part of an experienced team.

What we can offer you:

• You actively shape the development of mass spectrometry in an innovative, growing biotechnology company.
• You will become part of an experienced, highly motivated and diverse team.
• You will receive individually tailored training, gain experience and assume increasing responsibility for your area of expertise.
You work in a company with flat hierarchies, short decision-making processes and an active culture of discussion.
You will receive an attractive remuneration package, the offer of a company pension scheme and flexible working hours with the option of working from home.
You have 30 days vacation (because we love what we do, but we also love vacation!).
You can strengthen yourself with our fabulous espresso and free lunch catering on "DeliciOS-Thursday".
You are invited to various team events such as climbing, rafting or relay marathons and our half-yearly company celebrations.

Sounds interesting?

We are looking forward to receiving your full application, two references, your expected compensation, and a feasible start date to:

Dr. Jan Muntel, Gruppenleiter Massenspektrometrie und Proteomics
OmicScouts GmbH, Lise-Meitner-Str. 30, 85354 Freising, Germany
