

Open position in **Bioanalytics**

We are an early-stage biotechnology start-up at the university hospital of Ulm and we develop an innovative inhibitor of the complement system. Our vision is to help patients suffering from rare but life-threatening diseases. Currently we are funded by the BMBF and will receive further funding from October. We want to advance the development of our lead molecule and are looking for qualified scientists who are highly motivated to support us in this endeavour. We are looking for:

(Associate) Scientist (m/f/x) – Bioanalytics (full-time)

Your responsibilities:

- Performing in vitro experiments to determine pharmacokinetics & pharmacodynamics
- Participation in animal experiments
- Processing and analysis of tissue and blood samples (human & murine)
- Documentation, evaluation and presentation of the conducted experiments & results

Your qualifications:

- (future) M. Sc. or PhD in the field of biology, biochemistry, biomedicine, or similar
- Experimental animal science course (FELASA B or comparable) is advantageous
- Ideally experience with ELISAs, immunohistochemistry, flow cytometry
- Highly motivated, organised, and independent work style with hands-on mentality
- Strong team player with excellent communication skills in German/English

We offer:

- Starting from October 2023, a position for the funding period (2 years), with the prospect of being taken over by the company to be founded (potentially in another location)
- The unique opportunity to work in a biotech startup right from the start
- An innovative working environment and collaboration with world-leading experts
- Payment according to TVL E13/2

Are you interested? Then we look forward to receiving your application. Please send us your CV and two to three sentences explaining why you are interested in this position to: arthur.dopler@uni-ulm.de and matteo.mohr@uni-ulm.de
