

# Self-Evaluation Report

## for the Active Participation in the Academic Environment of the TUM

(According TUM Regulations for the Award of Doctoral Degrees, clause 8 and Statute TUM-GS clause 15 (6))

The active participation in the environment of the TUM is an important and useful basis for a good scientific qualification.

**At the beginning of your doctoral project:** We recommend, already at the beginning of your doctoral project to consider how you would like to participate in the TUM and how this participation should contribute to your development as a scientist. To do this, the questions raised in this document can benefit you.

**At the end of your doctoral project:** All doctoral candidates without a TUM employment contract are obligated to write a self-evaluation report based on this document. At the end of the doctoral project this report is to be countersigned by the supervisor and then submitted to the Graduate Center Weihenstephan.

This document is designed to assist you in saving time in the creation of your report.

### Names

Doctoral candidate \_\_\_\_\_

(TUM) Supervisor \_\_\_\_\_

### Participation in the TUM

Which tasks or activities were connected to the institute of your supervisor or other institutes of the TUM?

Where at TUM	Task / Activity

### Example of Task / Activity

- Interviews with the supervisor
- Institute seminar, doctoral colloquium, journal club
- Learning of specific research methods
- Exchange with other scientists (work group meetings or informally)
- Activities for the doctoral project (laboratory, analysis, discussion of data and results, etc.)
- Collaborative work on publications
- Tasks for the chair (teaching, supervision of internships, master theses, etc.)
- Activities for other research projects
- Etc...

### Résumé

Please place the following questions on a separate sheet (in bullet points):

1. How have I benefited from my connection to the TUM? What has helped me and what were the success factors?
2. What standards and working practices which I have learnt at my supervisor's institute do I find most valuable?
3. What facilities and services beyond the Institute have I used and seen as profitable?
4. How have I been able to extend my personal contacts through my connection to the TUM? Have even starting points to a successful collaboration due to and beyond the doctoral project come about?
5. How could I contribute to the work of the Chair / Institute?

I hereby confirm the correctness of the information towards my (TUM) supervisor:		
Place	Date	Doctoral candidate
I confirm as supervisor to the GZW, the above measures for integration in the scientific environment of the TUM as specified to have taken place and were adequate for a good scientific education:		
Place	Date	Supervisor

Enclosure: Résumé
